Tobacco Quota Voting July 16

WASHINGTON — Secretary of Agriculture Clifford M. Hardin proclaimed acreage and poundage marketing quotas Wednesday for the next three flue-cured tobacco crops beginning in 1971.

Hardin said growers will vote in a referendum July 16 whether to continue quotas and price supports for the next three years.

If voters approve, by a two-thirds majority, the program for three-years—as they did in 1967—they will be subject to quotas and will receive price supports for their crops.

The marketing quota for the 1971 flue-cured crop is 1,071,400 pounds, about the same as for this year, the Agriculture Department said. The average yield goal for 1971 is 1,834 pounds an acre, the same as for the last six years.

Flue-cured is the largest type of tobacco used for cigarettes. It is grown in Florida, Georgia, North Carolina, South Carolina, Virginia, and, to some extent, in Alabama.

The polling place for Appomattox County is Chap Voting Precinct.

The hours for voting will be 7 a.m. to 7 p.m. local time.
